

Please reject NAB Petition 04-160. XM Satellite Radio has been a wonderful addition to my ability to gather news, a variety of music, and comment all from one source. If there is a channel/station that might be offensive, I have the ability and the responsibility of contacting XM directly. No governmental group should limit my responsibility or moral prerogative. Please support XM Satellite radio and the ability to actively seek out alternatives to the information and music found on publicly owned radio stations.

Thank you for your consideration.
